

Memory Care philosophy

We embrace a holistic approach for elders with cognitive impairments including validation therapy, aromatherapy, music, exercise, creative arts, and pet therapy in daily and weekly programming. Staff receive training in person-directed approaches. This allows for regular engagement that only happens in a community-based setting.

Our intimate living and outdoor spaces are specifically designed to encourage more interaction with other residents and team members—minimizing isolation and confusion which can lead to a faster progression of impairments.

Family support

Those with memory loss flourish when they feel involved and have the support of family and friends. We believe in preserving that loving relationship. All are invited to participate in the care and services of their loved ones as well as educational events—we'll work together to best meet the needs of the elder.

 a Compass Senior Living community

*Guided by goodness,
loyalty, faith, and fun*

Our philosophy

The Pear Valley family is a warm, loving community as different and special as the unique people who live here. It is a place of vibrancy and life; promoting meaning and joy in the lives of residents, families, and our care team members.

We believe people make all the difference. Treating people well - with respect, trust, care, and good humor - can be quite contagious. As a team, knowing our 'true north' enables us to follow the path to do what is right, proper, and good.

Our mission is simple. We are **guided by goodness, loyalty, faith, and fun.** If these values resonate with you, we invite you to join us on this journey.

Your living is determined not so much by what life brings to you as by the attitude you bring to life; not so much by what happens to you as by the way your mind looks at what happens. — Khalil Gibran

Assisted Living and Memory Care

We advocate for a shift from institutional models of care to person-directed values and practices. This means we put the elder and their preferences first. Well-being, as a frame of reference, requires us to focus on the strengths, abilities, dreams, and health and social goals of each individual.

Our Growth & Wellness plans aid in building specific care goals and focus on seven wellness domains:

- Identity
- Growth
- Autonomy
- Security
- Connectedness
- Meaning
- Joy

We offer assisted living studios and one-bedroom apartments and private memory care studios. All are designed with elders' needs in mind as physical and cognitive needs change.
