

**Here are just a few ways Homewatch CareGivers supports patients and families, which fosters successful outcomes for all concerned.**

**Homewatch  
CareGivers®**

## Communication

We keep care providers posted on issues that are critical to avoiding complications – everything from changes in cognition, to identification of red flags, to changes in family dynamics.

## Transportation

We drive patients for procedures, follow-up appointments and errands when patients should not be driving and no family caregiver is available.

## Meal Preparation

We support patients in meeting dietary restrictions through shopping and meal preparation of healthy options, while honoring cultural traditions.

## Medications

To improve adherence, we handle medication reminders including when and how to take them. Additionally, family and care providers are notified of missed dosages and undesirable side-effects.

## Safety

Our trained caregivers address risks associated with memory impairments such as wandering from home or leaving the stove on. They also address risks associated with impaired functional status such as falls, particularly associated with bathing and transfers.

## Companionship/Engagement

By helping patients stay engaged in their lives, we help them stay engaged in their care.

## What Sets Us Apart

- No minimum hours
- Available 24/7, 365
- Ability to staff in 2 hours
- Quality assurance visits every 30 days
- RN/(M/LC)SW oversight
- Condition-specific training for caregivers
- Evidence-based tools to track and report progress
- National, annual, multi-jurisdictional background checks upon hire and annually
- DMV checks, vehicle inspections and motor vehicle insurance

## Service Area

Greater Tacoma Area and surrounding Pierce County cities.

**Let's make  
healthcare better.  
Together.**

We can support an effective,  
coordinated continuum of care.

[www.hwcg.com](http://www.hwcg.com)

## Improved recoveries and reduced admissions start here

Healthcare is ever evolving. All providers are encouraged to innovate. Let's work together to create an effective coordinated continuum of care to meet new goals for cost-efficient, quality care and accessibility for patients. Homewatch CareGivers plays an essential role in that continuum.

## We handle the baths, the meals, and more

Highly trained caregivers help patients with everyday things that are essential to health and wellness – everything from preparing healthy meals to bathing, supporting adherence to medication schedules, and helping your patients get around the house that is kept safe and clean.

The Homewatch CareGivers' approach to care helps avoid the setbacks that can lead to expensive and difficult readmissions to the healthcare system. As a result, we achieve the aim of reducing costs and improving outcomes while patients can remain in their homes.

It all starts by working together. Let's start, today.

# The Challenges

The numbers are in, and they show growing challenges in healthcare. Caring for seniors requires a unified team to meet today's demands.\*

**\$34 billion**

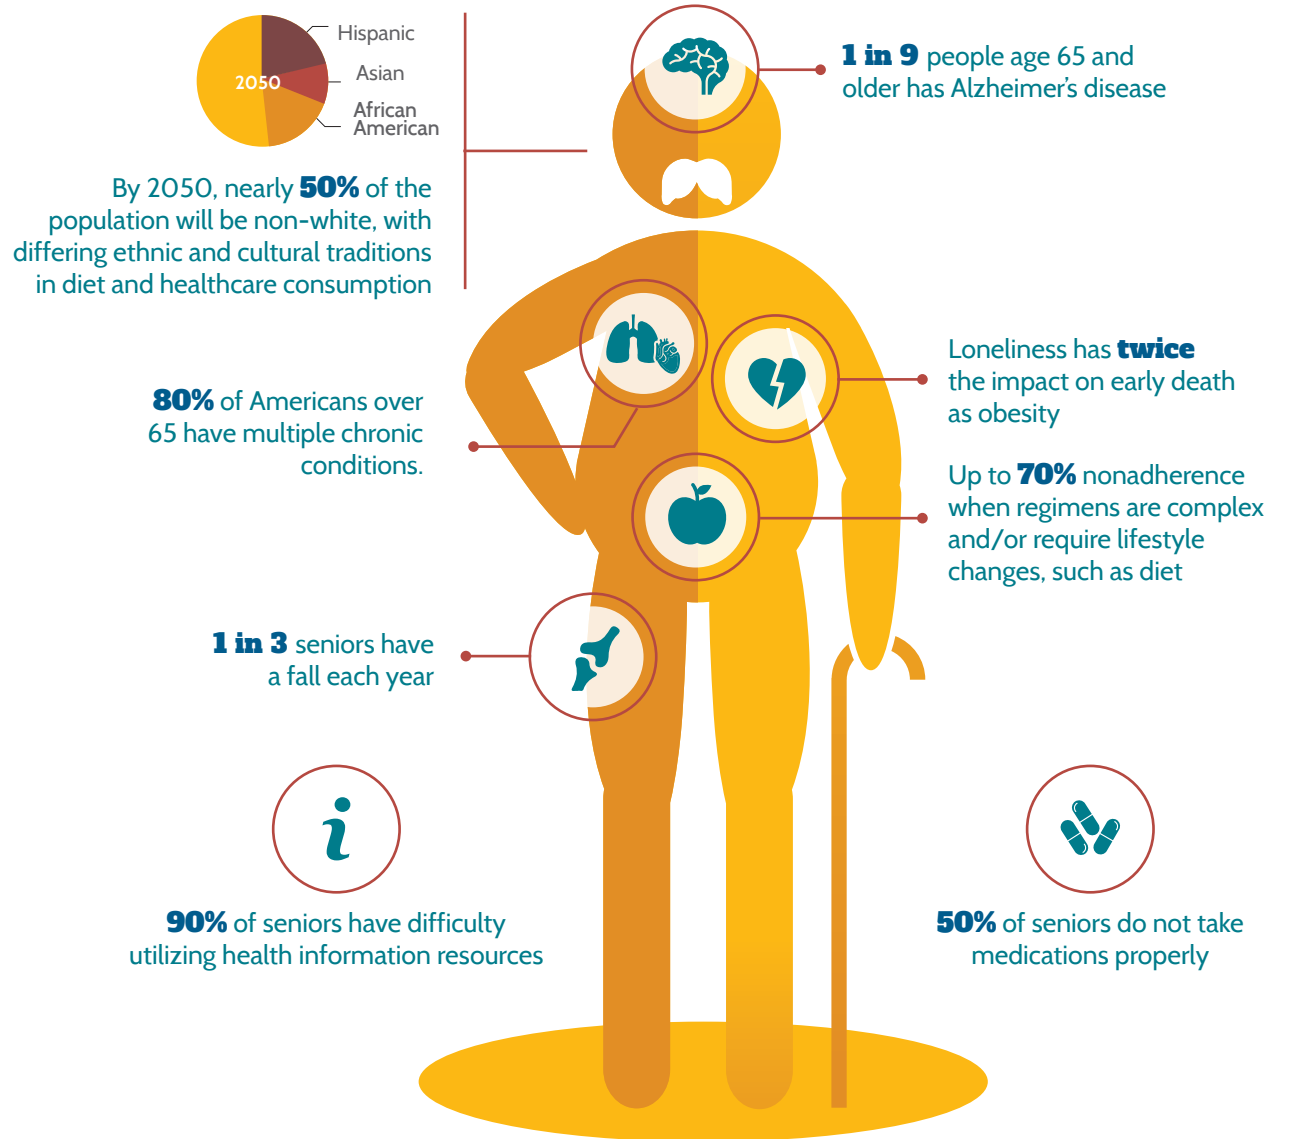

annual cost of complications from falls

**\$300 billion**

annual cost of medication mismanagement

**\$903 billion**

estimated yearly Medicare spending by 2023
