- *Certified case manager designs the care plan*
- *You select your caregiver and payment program to suit your situation*

CLIENT REVIEWS

....We found the owner & employees to be extremely caring, capable, and flexible in accommodating the needs of our aging mother. We appreciate their ability to adapt to changing needs and schedules and provide a number of services including monitoring medications, light housekeeping, errands, etc. and giving constant feedback. Their care has greatly reduced our personal stress level, knowing that our mother is now able to remain in her own home and receiving excellent care. – *Karen Shadley*

When an insurance company decision resulted in my sister being discharged from a rehab facility 3 weeks before her therapists felt she was ready, Comfort Makers saved us! She came home before she was OKed to walk independently with her walker or use her toilet and shower. As a burned out caregiver with health problems of my own there was no way I could have handled sponge baths, bedside commodes, and the rest of her care all on my own. Katie responded promptly. She and a very compassionate nurse did a thorough assessment on our first day home and care started the next day. My sister does not always adjust easily to change, but every caregiver she had was so friendly and caring that she liked them all. And they were all so efficient! My sister and I were amazed at how much they accomplished in the two hours per day they were with her. Those two hours gave me a much-needed respite to go home and catch up on my own life a little. A silver lining to the month I spent at my sister's with Comfort Makers there to help was that it gave me an opportunity to get every inch of her apartment cleaned and organized...The magnitude of the task overwhelmed me when I faced it alone, but it turned out that several of the Comfort Maker caregivers were great organizers. With their help, my sister, her cat, and her apartment were all very well-cared for. – *Ardis S.*
