The former Nathaniel Curry Estate...

Curry Manor was built in 1893 by the Curry Family of San Francisco in Nathaniel Curry's attempt to insulate his family from the rigors of "big city living". It's Victorian mansion was built on 2090 acres in beautiful Garden Valley.

Nathaniel Curry passed away before the home was completed, but his wife and seven children chose to follow his wishes and relocated their new home that was later known as Riversdale Farm, where they resided for the next fifty years in their beautiful Victorian home. His will indicated that the estate would not be divided until the youngest child reached the age of 21, thus insuring that his family would stay together.

Curry Manor Residential Care Facility was established in 1982. Nathaniel Curry's wish to provide shelter for his family has now been extended to our community and their families.

We offer Residential Care and Memory Care within a safe, secured environment for freedom of movement.

Rates for care vary with each individual's level of care. Curry Manor is a certified Medicaid provider.

We offer for residents to remain here in their home for the entirety of their ever changing needs.

"Curry Manor is a SPECIAL place, for SPECIAL people, with SPECIAL needs..."

"Creating SPECIAL moments for residents to function as best as they can... taking pride in our care."

We allow all of our residents the freedom to be outdoors with the least restrictions as possible.

Curry Manor Residential Care Facility is a beautiful landmark located in peaceful Garden Valley.

Our residents are able to go outdoors and walk along a paved, secured walking path within an orchard and farm setting.

At Curry Manor we promote independence, dignity and compassionate care with focus on what residents are still able to do rather than what they can no longer complete.

We have an excellent caregiving staff composed of professional staff and caregivers. We are well known for our quality caregiving practices as well as our specialty in caring for those with advancing Alzheimer's disease.

We try hard to find out what makes each of our residents so special. Past background information is collected from families prior to residents moving to our facility. We inquire into personal interests and design an individualized plan of care based on the resident's preferences and social needs.
