

*Our mission is to
enhance the life of
every person we serve.*

Home Health Services

Doctor's Orders

Home health is prescribed by a doctor for the patient to continue treatment and recovery within a home setting. These services are usually short-term and the frequency and number of visits are determined during the first visit by our licensed health care professional.

Trained, Caring Professionals

Signature Home Health nurses and therapists focus on teaching the patient, family, and caregivers the skills necessary to assist with a patient's recovery. Homebound patients require intermittent visits and may receive the following services as appropriate:

- Skilled nursing
- Physical therapy
- Occupational Therapy
- Speech therapy
- Medical social worker
- Home health aide
- Nutritional counseling
