*Village
at Valley View*

The Village at Valley View offers three separate cottages that each feel just like home with a large living room, den, kitchen, and family-style dining room.

The beautiful, secure outdoor courtyards are designed for resident enjoyment as they sit and enjoy nature, stroll on the walking paths, or grow flowers in the raised garden bed.

Individualized 24-hour care is provided by dedicated staff who have received specialized training for interacting and caring for residents with memory loss.

Daily assistance is provided for grooming, dressing, toileting, bathing, meals, medication management, and oversight of health-related services.

Our resident-centered program provides engaging activities and a personalized care plan that ensures dignity, promotes independence, and encourages socialization. Each day is filled with meaningful indoor and outdoor activities specifically designed for residents with memory loss.
